About Me

Computer Science graduate who designs and builds products end-to-end — from Figma UI/UX to production frontend code. Currently solo-building StudyCat (concept, pixel art, UI, React + Tailwind frontend). Comfortable moving between design and code, with added depth in full-stack dev and ML/NLP. Looking to bring that ownership to frontend and design engineering roles.

Skills

Technical Skills:

- UI/UX & Product Design:** Figma, wireframing, prototyping
- Visual Design:** brand identity, illustration, pixel art
- Frontend:** React, Tailwind CSS, JavaScript, HTML, CSS
- Backend:** Flask, Bootstrap, MySQL
- Programming:** Python, Java, C, JavaScript
- Mobile:** Flutter, Firebase
- ML / AI:** PyTorch, scikit-learn, XGBoost, GNNs
- Tools / Platform:** Figma, Git, Vercel, Google Colab, VS Code

Soft Skills:

- Strong communication and presentation skills
- Team collaboration and multidisciplinary project experience
- Participation in community initiatives (Red Crescent, Peace Café Club)

Languages:

- English:** C1 (IELTS 7.5)
- Bangla:** Native Speaker
- French:** Basic (learning)
- German:** Basic (learning)

Education

- B.Sc. in Computer Science** June 2026
Brac University
 - CGPA:** 3.35 / 4.00
 - Key Courses:** AI, ML, NLP, Pattern Recognition, Bioinformatics, Database Systems, System Analysis & Design
 - Thesis:** Neural Machine Translation for Chakma-Bangla: An Exploration of Low-Resource Techniques for Model Optimization
- High School Certificate (Science)** 2021
Ideal School and College, Motijheel
 - CGPA:** 5.00 / 5.00
- Secondary School Certificate (Science)** 2019
Willes Little Flower School and College
 - CGPA:** 5.00 / 5.00

Projects

- StudyCat — Full-Stack Web App** Ongoing
Solo Project
 - Solo-built a full-stack productivity web app: pixel art, Figma UI/UX, React + Tailwind frontend
 - Shipped focus timer, session stats, and animated pixel-pet system with outfit/room customization
 - Owned entire pipeline — concept, art, code, deployment (Vercel)
- Neural Machine Translation for Chakma-Bangla**
Group Thesis
 - Fine-tuned BanglaT5 via Iterative Back-Translation for extreme low-resource NMT
 - BLEU 19.00 (+30.4% over baseline) — matched GPT-4.1 ICL, beat all prior fine-tuned systems
 - Python · PyTorch · HuggingFace · BanglaT5 · sacrebleu
 - GitHub: github.com/tohura-shehreen/Neural-Machine-Translation-for-Chakma-to-Bangla
- StudyHive - a Learning Platform**
Group Project
 - Led frontend: dashboard design + Flask/MySQL backend integration
 - Built YouTube-style resource-sharing hub for students
 - GitHub: github.com/tohura-shehreen/studyhive-a-learning-platform-main
- 3D Maze Escape Game**
Group Project
 - Built real-time 3D maze game from scratch (PyOpenGL, GLUT, GLU)
 - First/third-person cam, enemy AI, collision detection, timed gameplay
 - GitHub: github.com/tohura-shehreen/3D-Maze-Escape-Game
- eBird Bias Correction (GNN + XGBoost)**
Solo Project
 - Built ML pipeline correcting bias in citizen-collected bird data (GNN + XGBoost)
 - Owned preprocessing, modeling, evaluation, and documentation end-to-end
 - GitHub: <https://github.com/tohurashehreen/ebird-bias-correction-using-gnn-and-xgboost>

Experience

- Small Business Owner — Online Clothing Shop** Aug 2025 - Present
 - Independently managed end-to-end operations including social media marketing, paid ad campaigns, order fulfillment, and customer communication
 - Grew social media following through organic content strategy and targeted advertising
- Tutor — School Students** 2023-2025
 - Tutored primary and middle school students, breaking down complex concepts and adapting teaching methods to individual learning styles
